

Customer Orders Tab

V1.6 - PHP7 / MySQL5.7 tested

Compatibility: osCommerce versions with hooks (2.3.4.1 CE and all other versions with Paypal App)

NB: does not use FILENAMES constants. If you have renamed admin / orders.php you will have to change the hard-coding in the module.

Description

EXTENSION OF PAYPAL APP

This uses the hooks system and tabbed display of admin / orders implemented by the Paypal App.

It adds a tab to admin / orders which lists all orders from the customer of the current order if they have any others. The current order is highlighted. Clicking on one of the other orders will load it instead.

Works for all orders of customers with more than one order, not just orders paid by Paypal.

Compatible with 2.3.4.1 CE which has Paypal App built-in.

Uses tradition language defines, not Paypal App-style.

Installation

Copy the files into your shop.

No code changes and no admin install - it just works.

Version history change log

Changes v1.6

Small enhancement: display total number of customer orders on tab. Two files changed

- catalog/includes/languages/english/modules/hooks/admin/orders_customer_tab.php
- catalog/includes/modules/hooks/admin/orders_customer_tab.php

Changes v1.5

thanks @boelle for reporting bug

symptom - if previous tabbed content contained ul

(bulleted lists) the tab text was added to them as well as to the tabs.

bugfix: jquery query tightened up

osCommerce services: shop rescue, addons to order, customisation, migration from older versions, github help, integration with stock & accounting systems, eBay etc – contact john@sewebsites.net

SE Websites – ecommerce solutions – programming – integration

at the same time, simplified overcomplicated code in tab link

thanks @trier for spotting

1 file changed - includes/modules/hooks/admin/orders_customer_tab.php

changes v1.4

correct version control issue - unfixed version of

includes/modules/hooks/admin/orders_customer_tab.php

replaced with fixed version

changes v1.3

added catalog level to directory structure for clarity - no changes to addon files

changes v1.2

fix for multi-language stores - filter order status on admin language

thanks @piernas

1 file changed - includes/modules/hooks/admin/orders_customer_tab.php

changes v1.1

now compatible with BS Edge - no core changes
