

osCommerce

1.5.0 - Changelog

Date: 2011-01-24

- Added PHP5.3 and OsCommerce 2.3.1 support.
- Improved campaign and account handling. It now uses a database table to store them, instead of the setting fields in OsCommerce module admin.
- Using dynamic terms for NL instead of the PDF.
- Yearly salary limit for all countries, activation through admin by having a number larger than 0.
- Updated logotypes.
- Updated payment titles/names.
- Added missing language files and translations.
- Corrected sorting of pclasses in checkout according to "natural order".
- Added total credit purchase cost for Norway.
- Added client side validation.
- Added company + reference field.
- Fixed an minor issue regarding multiple taxes and order_total modules.
- Added annual interest rate for Norway. (show / hide available)
- Testmode (invoices) added and LIVE/BETA server can be selected via the admin settings.
- Translated non ISO-8859-1 characters to HTML entities to avoid encoding conversion issues. (scrambled symbols)
- Added address notice regarding billing = shipping address.
- Changed all "Kreditor" instances to "Klarna", also shortened "ot_kreditor_payment_chg" to "ot_klarna_fee".
- Fixed so invoice fee is in local currency (fixed and price based).
- Specifying shipment and handling fee in mk_goods_flags.
- Error links should be SEO-safe.
- Not including invoice fee in Sub-total (cart amount).
- Changed module titles in admin to e.g. "Klarna - Invoice (SE)".
- All inputs should be converted to ISO-8859-1, before being sent to KO.
- Updated the view pclass after update pclass.
- Ported some changes over to the pre-pay invoice module parts.
- Various bug fixes and corrections.
